

Department of Biological Sciences Seminar Announcement

Dr. R. Meganathan

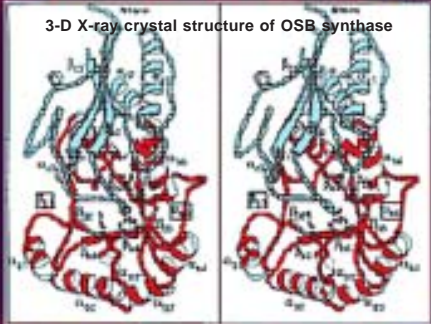

NIU Professor,
Presidential Research Professor

R. Meganathan

*Presidential Research Professor
Department of Biological Sciences
Northern Illinois University
DeKalb, Illinois
USA*

3-D X-ray crystal structure of OSB synthase

Background Information:

Vitamin-K and coenzyme Q biosynthesis in bacteria and plants—these two compounds play important roles in the respiration of bacteria and in the respiration and photosynthesis of plants. The genetics, molecular biology, enzymes, and intermediates involved in the biosynthesis of these compounds are being investigated using the techniques of genetics, biochemistry, and molecular biology.

Biochemisry, Genetics and Molecular Biology of Vitamin-K Biosynthesis

Date: 10 Sept 2003, Wed
Time: 10 am
Venue: DBS Conference Room, Blk S3 Level 5
Host: Dr Sanjay Swarup

All are welcome
